Faculty of Electrical Engineering, Computer Science and Information Technology Osijek

Advanced Web Programming

Task 1.

Create a **GraduateThesis** class in PHP. This class must implement the **iRadio** interface (which it will have create, save and read methods) which means that the class **GraduateThesis** must have the methods specified. You have an example of an interface in lecture 1 in the **User.php** script. **GraduateThesis** class will have variables work_name, work_text,
work_link and identification_number.

You need to connect to the site URL https://stup.ferit.hr/zavrsni-radovi/page/$number/
using socket or cURL where $number goes from 2 to 6.

As a result, the page will return to you the HTML code that contains the information needed to create the object classes **GraduateThesis**. Example code containing the required information:

```
<img width="320" height="202" src="http://stup.etfos.hr/wp-content/uploads/2016/11/08393361027.png" class="attachment-blog-medium size-blog-medium wp-post-image" alt="" srcset="http://stup.etfos.hr/wp-content/uploads/2016/11/08393361027-200x126.png 200w, http://stup.etfos.hr/wp-content/uploads/2016/11/08393361027-300x189.png 300w, http://stup.etfos.hr/wp-content/uploads/2016/11/08393361027.png 320w" sizes="(max-width: 320px) 100vw, 320px" />
Crveni brojevi u gornjem primjeru su oib tvrtke.

<a href="http://stup.etfos.hr/index.php/2016/12/28/tehnologija-rada-pod-naponom-na-niskonaponskim-postrojenjima-u-republici-hrvatskoj/"> Tehnologija rada pod naponom na niskonaponskim postrojenjima u Republici Hrvatskoj </a>
Crveni brojevi u gornjem primjeru je link rada. Plavi tekst je naslov rada, a tekst rada može se saznati na linku rada.
```

Create a new **GraduateThesis** class object and save the information you retrieve from the page using it create methods. You can create your own HTML parser or use an existing one:
https://simplehtmldom.sourceforge.io/

Create a MYSQL database called **thesis**. Inside database create a table of graduate theses with attributes equals in the **GraduateThesis** class (plus ID attribute). The Save Method in the **GraduateThesis** class should save all received theses in the table **graduate_theses**. The read method in the **GraduateThesis** class should retrieve all theses from the table **graduate_theses**.
